TERIMITE PROTECTION NOTICE

This building incorporates AKD structural timber which has been treated to conform to the minimum H2-F level requirements in AS1604. AKD's product brand for timber treated to H2-F is known as termi-blue® and is a registered protected trademark of AKD.

Timber envelope treated to the Hazard Level of H2-F, is deemed to be termite resistant building materials under the Building Code of Australia (BCA) and AS3660.

Timber treated to H2-F must be used only South of the Tropic of Capricorn; in areas North of the Tropic full H2 preservative treatment must be used.

Our H2-F treatment brand numbers (XXX Plant Number; YY Chemical Number; H-class Durability Class) can be found printed on our products or on tags at end of timber. This notice applies to the following treatment brands for AKD – 197 75 H2-F (Tumut); 240 75 H2-F (Highland Pine Oberon); 338 75 H2-F (Caboolture) and 511 74 H2-F (Colac).

The builder/homeowner should check on individual state or local legislation as termite protection requirements can differ depending on the area you build.

AKD recommends that the householder has the building regularly inspected for termite activity in accordance with AS3660.2 by a qualified pest controller or building inspector.
